

Figure 1: Schematic representation of the experimental design. The figure shows a flowchart of the experimental design. It starts with 'Pretest' leading to 'Main Experiment'. The 'Main Experiment' is divided into 'Condition 1' and 'Condition 2'. 'Condition 1' leads to 'Posttest' and 'Debriefing'. 'Condition 2' leads to 'Posttest' and 'Debriefing'. The 'Posttest' is a 'Control Posttest' and the 'Debriefing' is a 'Control Debriefing'.

Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of steps: 1. Pre-test (N=100) leading to 2. Main test (N=100) leading to 3. Post-test (N=100). The main test is divided into two groups: 'Control' and 'Intervention'. The intervention group is further divided into 'Intervention 1' and 'Intervention 2'. The control group is further divided into 'Control 1' and 'Control 2'. The diagram also shows the flow of participants from the pre-test to the main test and post-test, with arrows indicating the direction of the flow.
